Python Module Index 7

CHAPTER

ONE

APP.PY

Handles all app related stuff

project_folder.app.**adder**(*word*, *num*)
Combines a word with a number into one string.

Parameters

- **word** (*str*) – Word to to be prefixed
- **num** (*int*) – Number to be suffixed

Raises **AssertionError** – If word not of type str

Warning Does not check if num of type int

Returns Combined sentence

Return type str

project_folder.app.**hello_world**()
A simple function that prints to webpage

CHAPTER

TWO

FUNCTIONS.PY

Contains all functions used by module.

project_folder.functions.**adder**(*word*, *num*)

Combines a word with a number into one string.

Parameters

- **word** (*str*) – Word to to be prefixed
- **num** (*int*) – Number to be suffixed

Raises **AssertionError** – If word not of type str

Warning Does not check if num of type int

Returns Combined sentence

Return type str
